

## CAPABILITIES

### Next Level Health Innovations, LLC

is a self-certified small business in the Greater Washington, D.C. metro area. We provide a unique combination of clinical informatics and federal health program management expertise to deliver innovative policy, research, and data analytic solutions. We connect the dots between health information exchange standards, novel data sources, and cutting-edge analytic approaches to promote equitable care and improved health outcomes.

### Health IT Policy and Program Support

We understand the historical context and forward-looking priorities of the largest public sector health improvement and interoperability programs. We analyze program data, navigate stakeholder interests, and co-create policy requirements with public sector program leaders.

### Project Management

Our project management approach is centered on using diverse teams and novel collaboration tools. Our strong client relationships and rigorous attention to detail results in high-quality deliverables that are provided on time and within budget.

### Systems Development

We design, build, and deliver user-centered solutions by translating program priorities into technical requirements for statisticians, software developers, and data visualization experts.

### Quality Measurement

We lead high priority quality measurement initiatives, including measure concept designs, care gap analyses, performance result stratification, sub-group analyses, and measure feasibility assessments. Our team translates improvement goals into digital quality measure specifications aligned with United States Core Data for Interoperability (USCDI) and Fast Healthcare Interoperability Resources (FHIR) data standards.

#### Health IT Policy and Program Support

- › Environmental scans
- › Multi-stakeholder coordination
- › Technical Expert Panel recruitment and management
- › Program monitoring and strategic planning
- › Rulemaking and public comment support
- › Education and outreach

#### Project Management

- › Project leadership and task management
- › Cost monitoring
- › Deliverable tracking
- › Client relations
- › Quality assurance plans

#### Systems Development

- › Product roadmaps
- › Requirements definition
- › Stakeholder interviews
- › EHR vendor engagement
- › Technical feature prioritization
- › User interface design
- › Systems testing
- › Implementation support
- › FAQ's and implementation guides
- › Data standards review
- › FHIR implementation

#### Quality Measurement

- › Quality measure concept design
- › Disparities analyses
- › Clinical guideline reviews and literature searches
- › Concept prioritization
- › Value set and measure logic analyses
- › Test site recruitment
- › Workflow analyses
- › End-user interviews
- › Test plans and summary reports
- › National Quality Forum endorsement packages
